AMECA Announces Accreditation to Calcoast ITL For
Testing Automotive Exterior Lighting Devices

Washington, DC – AMECA (Automotive Manufacturers Equipment Compliance Agency, Inc.) announces it has extended accreditation to Calcoast ITL to test automotive exterior lighting devices.

Only technically proficient, professional laboratories which maintain a record keeping system with a calibration program and have demonstrated the ability test to every aspect to the relevant safety standard are granted AMECA accreditation. AMECA requires every laboratory to establish and utilize a documented calibration program to assure the required degree of accuracy in measurements. The documented accuracy of all measurement instrument standards remain traceable to primary standards maintained by the National Institute of Standards and Technology of the United States of America or the national physical laboratory maintaining such standards in the country in which the laboratory is located.

Through the accreditation process, Calcoast ITL demonstrated the equipment, and appropriate qualifications to produce accurate, repeatable and technically valid test data.

The AMECA Equipment Compliance program is a centralized one-stop program that notifies government, industry and the general public about items of motor vehicle safety equipment that have been tested by an AMECA-accredited laboratory and found to be in compliance with applicable United States standards. Our clients and market are the national and international automotive industry, the standards-setting community, the federal government's General Services Administration (GSA), numerous state governments, as well as some foreign governments. AMECA maintains a listing of items that have been tested and currently comply with the applicable standards. Called the "Compliance List of Automotive Safety Devices", this listing is updated quarterly and is available free as an Adobe PDF document distributed via email. The international "List of Acceptable Plastics for Optical Lenses and Reflectors Used on Motor Vehicles" is also maintained by AMECA. This document is updated twice a year and is also available free as an Adobe PDF document distributed via email. To receive your free copy of either documents send an email request to info@ameca.org.
